InCK Business Highlight

Coming Soon Integrated Care for Adults (InCA) at the iHub at the Egyptian Health Department

Integrated Care for Adults (InCA) will help navigate the care services needed to optimize the health and social needs of adult Medicaid beneficiaries age 21 years and older living in our five-county region of Saline, Gallatin, White, Wayne, and Hamilton. InCA partners include Southern Illinois Healthcare (SIH), Harrisburg Medical Center/Mulberry Center, Ferrell Hospital, and the Gallatin County Wellness Center. With the support of our partners, InCA can communicate directly with providers to address the social and health needs of the client to aid in the best outcomes in care.

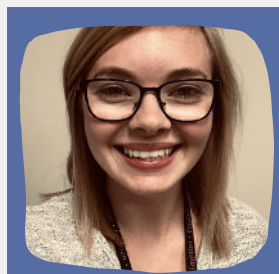

Staff Spotlight

"I started here at Egyptian Health Department just a few months ago as a Service Integration Coordinator for the InCA program and I have loved every moment of it! I came from a background of behavioral health as I was previously a Registered Behavioral Therapist for children with autism. When I graduated with my Bachelors in speech communication, I wasn't really sure what I wanted to do with it, all I knew was that I wanted to be able to help people. Helping people in need has always been a dream of mine and I finally get to fulfill that dream by working here in this Department. I am so thankful to be here!"

Rachael Frailey

InCK Success Stories

Micah Dodd

I am Micah Dodd, Early Childhood Therapist, at Egyptian Health Department! I primarily work with children 0-10 years of age. I work with children in DCFS care, children and families who have experienced trauma, and children with behavioral needs. The best part of my role here at Egyptian is working with children and their families. Village InCK has made my job even easier, because I have been able to connect various families to their coordinators over the last few months. InCK has been a great resource for these families in terms of connecting

them to services like housing and clothing. It has been refreshing to have additional support for my families. I hope InCK continues to grow and reach more families!
